

# BarrelCooler CT-FK

## Barrel cooling unit

The new barrel cooler CT-FK is a stainless steel cooling hose with an integrated fermentation siphon and also contains a plunger sleeve for the hygienic insertion of an electronic cable temperature sensor.

The unit is placed directly on a barrel or tank and connected to the cold water circuit via the two connections.

### BarrelCooler CT-FK

Hose material stainless steel 1.4404, AISI316L, surface polished

max. operating pressure 4bar
